Energy Optimization

Maximize Your Load Flexibility with Fewer Disruptions

Is your business looking for a smarter way to manage energy costs? With Constellation's Energy Optimization services, powered by GridBeyond's intelligent energy solutions platform, you can take control of your energy costs while helping support grid stability. The platform uses machine learning to analyze equipment and market data, identifying the optimal times to curtail. This allows you to manage your energy consumption and maximize value with minimal disruption to your operations.

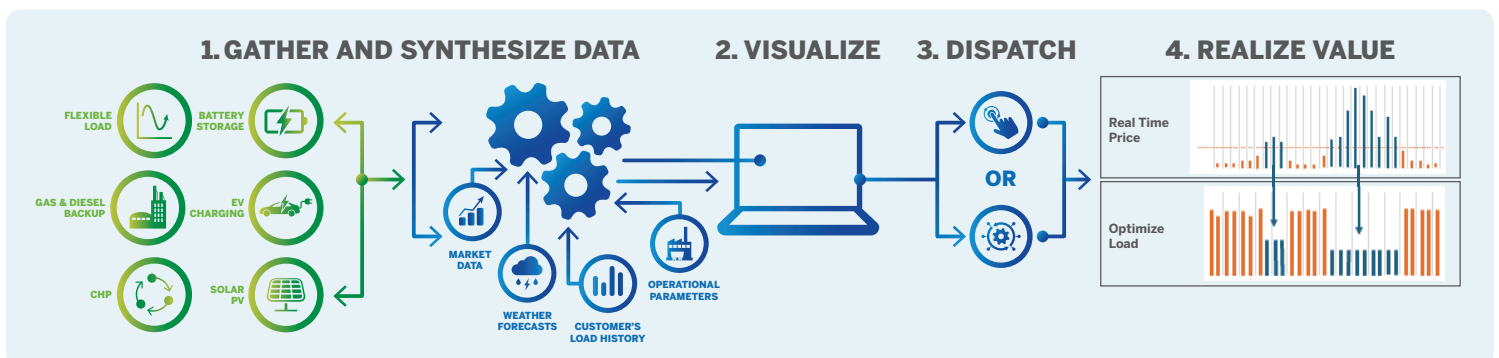

With our Energy Optimization services, you can reduce costs, earn revenue and contribute to grid stability through load response programs:*

» **Peak Response:** Reduce your demand-based charges by curtailing your load when Constellation notifies you of peak demand hours on the grid.

» **Price Response:** Receive additional revenue through on-bill credits for curtailing your load when Constellation notifies you of peak energy market prices.

» **Demand Response:** Generate revenue through load response programs offered by grid operators.**

These flexible load response programs maximize value and efficiency, ensuring you get the most out of your energy management by tailoring your strategy to meet the unique needs of your business.
